Project Title
A good title attracts attention, but also gives information about the project.

ABSTRACT
Provide a concise paragraph summary of your project including: purpose, hypothesis, procedures used, data summary or analysis, and conclusions.

MATERIALS
Record everything you use for your project. Do not include the materials for the board.

PROCEDURE
Record the steps you did during your experiment. Make sure others can follow them.

DATA
Visually communicate your data in the format that matches the type of data you collected. You can show both raw and interpreted data. For example: spreadsheets, photos, diagrams, charts, maps, graphs, models, etc.

RESULTS
- Analyzing and Interpreting Data
- Obtaining, Evaluating and Communicating Information
- Reason abstractly and quantitatively
- Attend to precision
- Look for and make use of structure
- Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective analysis of content
This is a summary of results from the experiment. Explain your Data, Photos, Charts, Graphs and models in paragraph form.

CONCLUSION
- Engaging in Argument from Evidence
- Obtaining, Evaluating and Communicating Information
- Construct viable arguments and critique the reasoning of others
- Draw evidence from informational text (including student data) to support analysis, reflection, and research
- Write arguments to support claims using an analysis (of all components of process and research) using valid reasoning and valid and sufficient evidence
Restate question
Describe your observations: before, during & after the experiment
Summarize your research
Describe your experiment
Explain and justify your conclusion with your data and observations.

NEXT STEPS
- Obtaining, Evaluating and Communicating Information
- Asking Questions and Defining Problems
- Make sense of problems and persevere in solving them
- Conduct short as well as more sustained research projects based on focused questions demonstrating understanding of the subject under investigation
- What new questions do you have as a result of your inquiry?

Write down everything you do from start to finish for your project. Do not include preparing the board. Journal should be handwritten and authentic. Be sure to have your journal on display with your board.
