How to do a Science Fair Project

Identify an area of interest. **START** a Journal or Notebook for the Project.

Gather information; review the literature, question people. Write everything in your notebook.

Select specific problems within your area of interest

State a specific problem

Gather more information; be more specific

Revise, if necessary!

Formulate a hypothesis

Plan how to do your investigation or experiment

Get approval to do investigation or experiment from your teacher & your parents

Conduct the investigation or experiment

Collect and record results in your notebook.

Analyze and interpret results, using graphs, charts and statistics

Prepare your Science Fair Display

Formulate conclusions and write a report
